HIGH SCHOOL REQUIREMENTS

Most students go beyond the minimum requirements because they want to take advantage of the many choices available or because they plan to meet differing post-secondary entrance requirements. If you are undecided about the path you might take after high school, you are like many students and will discover your talents and interests while working towards your Diploma or Certificate of High School Achievement.

NOTE: Many high school students complete high school in three years. On the planning page on the back of this document, there is a possibility of a fourth year. Some reasons you might take a fourth year include:

- ❑ meeting Diploma requirements after earning a Certificate of High School Achievement
- ❑ achieving a balance of academic goals, complementary course interests and extra-curricular commitments

**Talk with your
counsellor and principal
if you are considering
a fourth year**

IMPORTANT:

A Certificate of Achievement is NOT a high school diploma. K&E courses align with other courses to maximize opportunities for your success, to support your completion of high school, and to easily allow you to transfer to other courses. Such flexibility makes it possible to work towards achieving a High School Diploma. Another semester or year of high school may be part of your plan to do this.

- ❑ To qualify for a Certificate of High School Achievement, you must successfully complete a minimum of one academic Knowledge & Employability course (English, Math, Science, Social).
- ❑ A Certificate of High School Achievement can be earned in 2 to 4 years.
- ❑ Written consent is required to register in each K&E course.
